

Machinery list

Convincing precision. Down to the last detail.

We process all machinable metal materials, in sizes ranging from 4 to 95 mm. With production facilities covering over 10,000 m² we produce on more than 40 latest CNC and conventional single and multi-spindle automatic lathes, bush-type and automatic turret lathes for many industries.

Multi-spindle automatic lathes for work pieces from Ø 5.0 mm to 51.0 mm

Tornos	SAS	16.6
Schütte	SG	18
Schütte	SF	26/ 32/ 42/ 51
Schütte	SC9	32
Index	MS	22C/ 25/ 42C

Single-spindle automatic lathes for work pieces from Ø 6.0 mm to 95.0 mm

Index	GB	30
müga	TT	42
Index	ABC	65
CMZ	TA20Y	65
CMZ	TC35Y	95

Bush-type and automatic turret lathes for work pieces from Ø 4.0 mm to 60.0 mm

Bechler	AR/ BR	10/ 20
Index		25
Manurhin	KMX	26
Tornos	DT	26
Index	B	30/ 42/ 60

Our tools and mould design and our own tool grinding shop guarantee flexibility and economic efficiency at the same time. The latest automatic indexing plate lathe and CNC automatic lathes are provided for the further processing of complex parts.

- RIS-automatic indexing plate lathe
- MAZAK-NC lathe
- HURCO CNC drilling and mill centre VM 1
- Eccentric press maximum up to 2.5 t
- Thread rolling machine 3 mm – 20 mm with a pitch from 0.35 mm to 2.5 mm
- Exeron S 310 MF cavity sinking EDM machine
- CNC tool grinding centre Saacke UW I F
- Surface, circular and universal grinding machines,
- Vibratory grinding system

Our portfolio also has injection moulded plastic parts and injected special seals.

Arburg Allrounder 221-55-250/ 320 C/ 470 C Golden Edition

We offer you complete solutions for the installation of complex devices and support you with our long-time partners in the fields of optoelectronic 100% control, surface coating, heat treatment and laser marking.

Try us – we have over 160 motivated and qualified staff around the world to look after your affairs.
